SYSTEM ADMINISTRATION AND MAINTENANCE PROJECT
Capstone-Based System Administration Project

Group No.: _____
Capstone Project Title: _____
Members: _____
Instructor: _____

1. SYSTEM OVERVIEW

System Name: _____

Brief Description:
Briefly describe what the Capstone System does and who will use it.

Users of the System:

User	**Role/Access**
_____	_____
_____	_____
_____	_____

2. SYSTEM DEPLOYMENT

Describe how the Capstone System was installed and deployed.

Operating System: _____
Web/Application Server: _____
Database Server: _____
Hosting Environment: _____

Deployment Steps

1.
2.
3.
4.

Screenshot/Evidence:
[Insert screenshot of deployed/working system]

3. USER AND ACCESS MANAGEMENT

Identify how users and permissions are managed.

User/Role	Access/Permission
Administrator	_____
_____	_____
_____	_____

Describe how user accounts are created, modified, and removed.

4. SYSTEM SECURITY

Identify the basic security measures implemented in the system.

☐ User authentication
☐ Password protection
☐ Role-based access
☐ Firewall
☐ Software/security updates
☐ Database security
☐ Other: _____

Security Measures Implemented:

1.

2.

3.

Screenshot/Evidence:

[Insert screenshot]

5. BACKUP AND RECOVERY

Backup Plan

What will be backed up?

Backup Frequency:
☐ Daily ☐ Weekly ☐ Monthly

Backup Location:

Recovery Test

Describe how the system/database was restored from a backup.

Problem Simulated: _____

Recovery Procedure:

1.

2.

3.

Result:
☐ Successful
☐ Unsuccessful

Evidence:
[Insert screenshot]

6. SYSTEM MONITORING

Identify how you will monitor the system.

Resource/Service	Monitoring Method	Status
CPU	_____	_____

RAM _____ _____

Disk Space _____ _____

Database _____ _____

Web/Application Server _____ _____

Monitoring Screenshot:
[Insert screenshot]

7. TROUBLESHOOTING

Document **at least 2 system problems** encountered or simulated.

Problem 1

Problem: _____

Possible Cause: _____

Solution:

Result: _____

Problem 2

Problem: _____

Possible Cause: _____

Solution:

Result: _____

8. MAINTENANCE PLAN

Prepare a simple maintenance schedule.

Frequency **Maintenance Activity**

Daily/Weekly _____

Weekly _____

Monthly _____

As Needed _____

Examples:

- Check system status
- Check disk space
- Perform backup
- Apply updates
- Check user accounts
- Review system logs
- Test system functionality

9. SYSTEM ADMINISTRATION LOG

Record the actual activities performed by the group.

Date	Activity	Action Taken	Result
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

10. FINAL DEMONSTRATION

During the final presentation, the group must demonstrate:

1. **Deployment** – Show the Capstone System running on the server.
2. **User Management** – Show user/role configuration.
3. **Security** – Show at least one security configuration.
4. **Backup & Recovery** – Demonstrate backup and restoration.
5. **Monitoring** – Show system/server monitoring.
6. **Troubleshooting** – Demonstrate how one problem was identified and resolved.
7. **Maintenance** – Explain the maintenance plan.

REQUIRED SUBMISSION

☐ Project Template/Documentation
☐ Working Deployed Capstone System
☐ Screenshots/Evidence
☐ Backup and Recovery Evidence
☐ Troubleshooting Report
☐ Maintenance Schedule
☐ System Administration Log
☐ Final Demonstration

Deploy → Manage Users → Secure → Backup → Monitor → Troubleshoot → Maintain
